FIXED INCOME PORTFOLIO PHILOSOPHY

GH&A's fixed income philosophy is based on three core principles; preserving principal, maintaining liquidity and providing high current income. This philosophy is integral to the Fixed Income-Aggregate product which is a U.S. broad market strategy that is benchmarked to the Bloomberg Barclays Aggregate Index. The objective for this product is to outperform the benchmark net of fees utilizing a higher credit quality profile than the Index and with low turnover. The primary strategy to achieve this objective is through controlled interest rate anticipation, active sector rotation, and yield curve management.

GH&A employs a top-down approach in its fixed income portfolio construction. A broad fundamental analysis of duration, yield curve, and sectors results in a defined set of parameters for the individual issues that fit the portfolio. The portfolios are dominated by treasuries, agencies and agency guaranteed mortgage pass-throughs. As an internal rule, all corporate bonds must be rated a minimum of single "A" or better. Furthermore, we do not invest in any spread product with a maturity greater than ten years in order to contain risk. The high quality bias of the issues utilized reduces credit risk while ensuring ample liquidity. In addition, GH&A does not invest in non-dollar bonds, Yankees, high yield securities, zero coupon bonds or derivatives in its strategies. Likewise, the strategy does not utilize any leverage.

FIXED INCOME – AGGREGATE REPRESENTATIVE PORTFOLIO CHARACTERISTICS

Bloomberg Barclays Aggregate As of September 30, 2019

Portfolio

The characteristics shown are those of an actual portfolio that is representative of this strategy at a particular point in time. Individual portfolio characteristics may vary depending on the date shown as well as client-imposed restrictions, cash flows, etc. This information is supplemental to performance information. The composite disclosure is available on page 2.

Awards/rankings may not represent client experiences and are not indicative of future performance. Go to www.garciahiltonassociates.com/awards/ for additional information on each award.

*Historical information not required prior to 2011.

NM = Not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

Source: Barclays Live

The GH&A Fixed Income-Aggregate Composite is comprised only of fully discretionary, fee paying institutional portfolios, including those portfolios no longer with the firm. The Fixed Income-Aggregate investment philosophy utilizes high-quality U.S. investment grade fixed income securities. To help control risk, the portfolios purchase spread product (non-Treasuries) with less than 10-year maturities, 15-year Agency Guaranteed Mortgage-Backed securities and Corporate Bonds rated a minimum of single "A". The portfolios do not contain derivatives and do not employ leverage. The duration exposure is generally managed within a +/- 10% band around the Bloomberg Barclays Aggregate Index.

The composite benchmark is the Bloomberg Barclays Aggregate Index. The benchmark is used for comparative purposes only and generally reflects the risk or investment style of the product. For the period of January 1, 1992, through June 30, 1996, the minimum portfolio size for inclusion in the composite was \$1.0 million. Effective July 1, 1996 the minimum for inclusion in the composite was increased to \$2.0 million. The composite creation date is October 1, 1999.

Garcia Hamilton & Associates, L.P. (GH&A) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. GH&A has been independently verified for the periods January 1, 1993 through December 31, 2015 by Ashland Partners & Company LLP and from January 1, 2016 through December 31, 2018 by ACA Performance Services, LLC. The verification reports are available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

GH&A is defined as an independent investment management firm registered under the Investment Advisers Act of 1940 and prior to June 30, 2010, was known as Davis Hamilton Jackson & Associates. GH&A has chosen not to claim compliance prior January 1, 1993. A complete list and description of firm composites is available upon request. Past performance is no guarantee of future results.

The U.S. dollar is the currency used to express performance. Returns presented above are gross and net of management fees and include the reinvestment of all income. Net of fee results are calculated for the period of December 31, 1991 through December 31, 1994 by deducting the highest fee of .0375% from the monthly gross composite returns. Since January 1, 1995, the net of fees performance results are calculated based on actual fees. The management fee schedule for this composite is as follows: 0.25% of the first \$25 million, 0.20% of the next \$25 million, 0.18% of the next \$50 million, 0.15% of the next \$100 million, and 0.12% of the balance. In addition, some clients pay a percentage of annual outperformance of the portfolio versus the benchmark as agreed in the client specific fee schedule. Actual investment advisory fees incurred by clients may vary.

Additional information regarding policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Composite dispersion since January 1, 1993, is calculated using an asset value-weighted standard deviation of annual gross returns of those portfolios included in the composite the entire year. Standard deviation is presented as a 3-year annualized standard deviation measure of risk using monthly gross returns as of each annual period end.
